PATT CORPORATION

Patt Corporation was founded in 1926 as a Chicago company supplying the local industrial and commercial marketplace with high quality security products.

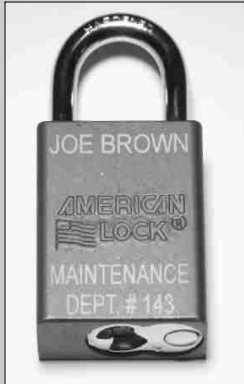

Patt Corporation still exists today as a Chicago based company supplying the United States and international marketplace with high quality security products that can be enhanced to meet custom requirements of the end user.

Patt Corporation places a high priority on the ability to ship orders complete in 24 hours or less. In order to ship in that time period we maintain an extensive inventory. This allows Patt Corporation to make every attempt to ship the same day the order is received, including custom orders.

Patt Corporation is a dynamic, fast growth and privately held company that answers to our customers, not to stockholders. For this reason every effort is given to our customers' orders, both large and small. Our most valued assets are customers and employees.

CUSTOM LASER ENGRAVING

ALUMINUM

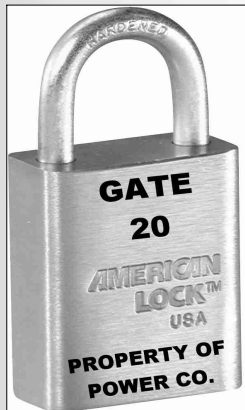

Patt Corporation stocks all eight colors (Red, Blue, Green, Yellow, Brown, Orange, and Purple) in the 1-1/2 inch width aluminum lock as well as the 3 shackle lengths of 1, 1-1/2 and 3 inches. 1-3/4 and 2 inch wide body aluminum padlocks are also in stock.

Custom laser engraving can be used for any of the following examples:

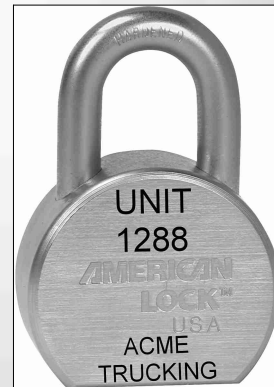

- Property Of (Company Name) — Company Logo
- Department ID Number — Department Name
- Employee ID Number — Employee Name
- Company Name — Company Address
- Sequential Numbering Of Padlocks
- Key Number On Padlock

KEY ENGRAVING AND STAMPING

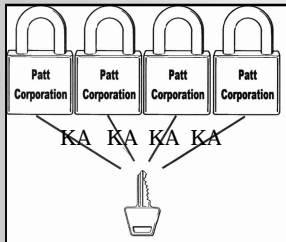

CUSTOM KEYING

Custom keying allows the end user the convenience to open a multitude of locks with a single key or allows management the ability to open an entire system, yet maintain single lock integrity for the individual user. The following examples are options that are available:

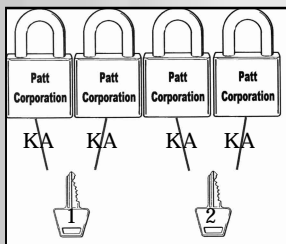

KEYED DIFFERENT

Each padlock will only open with its own individual key.

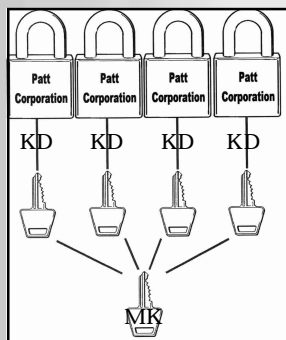

KEYED ALIKE

Each padlock will open with a single key. Any number of padlocks can be custom pinned to operate with a single key.

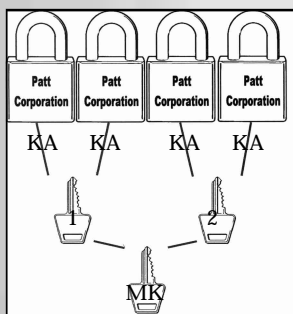

KEYED ALIKE IN SETS

Each set will open with a single key. Each set will only open with a single key that is unique to that set.

MASTER KEYED

Each padlock will open with its individual key, and a master key will open all padlocks within the system.

MASTER KEYED IN SETS

Each set will open with a single key, and a master key will open all sets within the system.

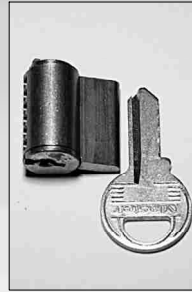

Grandmaster keying also available

CUSTOM SERVICES

In addition to custom engraving and keying, Patt Corporation performs a wide range of custom services to create a more user friendly product or to add a greater level of security.

RESTRICTED KEYS:
A unique cylinder and key profile makes unauthorized duplication of the working key very difficult.

MASTER LOCK® KEYING: Master 4 pin key (1K) and cylinder installed in an American Lock® padlock to match existing Master Lock® key numbers.

KEY RETAINING:
Key can not be removed unless the shackle is in the closed (locked) position.

REKEYING:
Padlocks in service can be re-keyed to eliminate the use of an unauthorized key or the proliferation of keys in use.

ID TAG:
1-1/4 inch diameter brass ID tag, engraved and secured to lock shackle. Available for 1/4, 5/16, 3/8 and 7/16 inch diameter shackles.

CHAIN ATTACHMENT:
9 inch zinc plated chain available for attachment on all 1/4, 5/16, 3/8 and 7/16 inch diameter shackles.

CHARTING:
Patt Corporation can keep a record of key numbers used in a custom built order. Charting helps eliminate key number duplication.

DISCONTINUED KEY NUMBERS: Patt Corporation can key into any existing and discontinued American Lock® key number in blade tumbler padlocks (H10 & L50 series).

CAM LOCK & CAM:
Tubular and flat key cam locks, available keyed different and keyed alike to existing key numbers. Custom bent cams are also available.

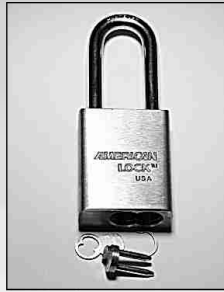

PADLOCK REFURBISHING: Padlock is disassembled, cleaned and rebuilt with new parts as required.

ADDITIONAL SERVICES & PRODUCTS

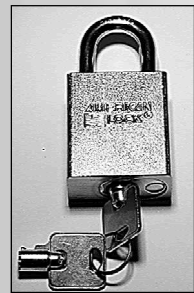

Patt corporation carries a wide range of padlocks as well as hasps to meet your security requirements. It is our priority to make every attempt to ship your order in 24 hours or less.

SHROUDED STEEL:
A shrouded shackle reduces the risk of shackle cutting by bolt cutter or sawing.

IC CORE:
Available in anodized aluminum as well as brass and steel. Removable IC core padlocks are without cylinders.

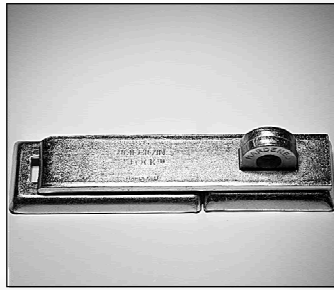

TUBULAR KEY:
Padlock with tubular cylinder available keyed different and keyed alike.

HIDDEN SHACKLE:
Interior locking shackle eliminates shackle cutting.

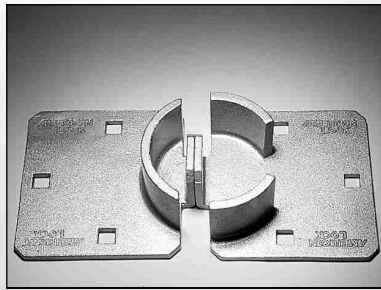

COMBINATIONS:
Available with key control and charting or without key control.

STANDARD HASP:
Hasp are available for general security to maximum security applications.

SAFETY LOCKOUT HASP:
Available in 1 and 1-1/2 inch diameter vinyl coated steel as well as 1 inch diameter 3-1/4 or 6-5/8 inch long heavy duty steel.

SPECIALITY HASP:
Maximum security hasps for hidden shackle padlocks are available in silver or white colors.

SERVICE PARTS: Pin kits, shackles, springs, cylinders, keys, retainers, cover plates, security screws and nuts are available for all padlocks with removable cylinders.
